-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I, claims 1-7, in the reply filed on 1/27/2006 are acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Marques et al. (WO 96/19704).

In regard to claims 1 and 3, Marques et al. disclose a refrigeration system controlling the refrigerant during start up, comprising compressor 1, condenser 2, parallel capillary 10,20, valve 20 in series with small resistance, evaporator 3 and temperature sensor S1 for the evaporator.

In regard to claims 5 and 6, Marques et al. disclose the restriction variation being determined in function of the temperature measured at a region of the space, particularly in a median portion of the evaporator.

In regard to claim 2, valve control on each capillary is a design choice.

In regard to claim 4, the selection of a predetermined time and reaching the predetermined temperature are equivalent, which is a design choice.

In regard to claim 7, the system disclosed by Marques et al. is capable to operate on two-stage compressor using carbon dioxide refrigerant.

Art Unit: 3744

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tokuhisa (JP 04203757).

In regard to claims 1 and 4, Tokuhisa discloses an air-conditioner comprising compressor 1, condenser 2, parallel capillary 3,4, valve 7 and evaporator 4. The valve 7 is opened for a specified time during starting of the cooling cycle.

In regard to claim 2, valve control on each capillary is a design choice.

In regard to claim 3, the small resistance on capillary 6 is inherent in the system based on the scientific reasoning that the purpose of capillary 6 is to reduce the resistance.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukuchi et al. (JP 06050646).

Fukuchi et al. disclose a refrigerator comprising a compressor 11, condenser 12, parallel capillary 21,22,23 with valves 24,25,26 and evaporator 7. Fig.4 presents the control of the valves for the capillaries during start up.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
